The Gateway to the Global Nuclear Industry
At the World Nuclear Association we influence the energy debate and open up business opportunities for your company.
World Nuclear Association

The industry organisation that represents the global nuclear industry

A network of the world’s leading nuclear companies in 38 countries.

Our 170 member companies represent all sectors of the industry: fuel cycle, reactor vendors, operators, engineering, construction, waste management and international services such as transport, legal, finance, insurance.

The Secretariat is made of 35 dedicated staff based in London, with representation in China, India and Australia, and headed by Agneta Rising, Director General.

Our Board of 17 industry leaders elected from our member companies provides governance and direction to the Secretariat.
“The World Nuclear Association is committed to: ensuring that the nuclear industry is best represented in all forums where its interests are at stake; enabling co-operation between its members; and communicating the benefits of nuclear energy in order to improve the market environment and secure greater support from key stakeholders.”

Agneta Rising
Director General, World Nuclear Association
1: We support the nuclear industry

• We promote nuclear energy by engaging with key global stakeholders on topics of strategic importance to nuclear development.

• We represent the global nuclear industry in key international forums.

• We provide the latest and most reliable nuclear information, including the Information Library of our website and World Nuclear News, the daily news service.

• We develop industry positions and reports on the issues that matter through our members groups.
Working together as an industry

Members groups are forums through which member companies share leading practice, conduct analysis and prepare position statements and reports.

- Fuel Cycle Working Groups
  - Fuel Market Report • Sustainable Used Fuel Management • Security of the International Fuel Cycle • Transport

- Plant Performance Working Groups
  - Cooperation in Reactor Design Evaluation & Licensing • Supply Chain • Capacity Optimization • Waste Management & Decommissioning

- Cross-Cutting Working Groups
  - Economics • Law • Radiological Protection

- Advisory Groups
  - Advisory Panel • Communication Group
Informing the debate

The World Nuclear Association is recognised for its authoritative and comprehensive information on nuclear energy.

Information Library

Our website is the world’s most accurate and accessible nuclear information resource. The Information Library features 180 detailed pages covering every aspect of nuclear energy.

World Nuclear News

Reaching over 40,000 people every day, WNN is the free public daily news service covering all nuclear industry developments.

Publications

We publish reports on industry topics and working group related activities. The authoritative Nuclear Fuel report and Supply Chain report are available free to members.
We represent the nuclear industry’s interests where the energy debate is taking place and deliver targeted information to key influencers.

**Industry**
Provide the right tools and platforms to nuclear companies to network, exchange and develop common positions.

**Partners**
Work in partnership with other nuclear bodies to strengthen the overall industry.

**Decision makers**
Bring the facts to where the decisions are being made and build relations with international influencers.

**Media**
Provide authoritative and timely information to the international press and trade media.
2: We open up opportunities for your company

- We offer you unique opportunities to interact and network with experts, industry leaders, customers and suppliers.

- We support your capacity building and nuclear skills development through the World Nuclear University.

- We collaborate with you and national associations to make smart and effective contributions to national dialogue.

- We give you privileged on-line access to industry reports, presentations and contact directories, and free printed copies of the biennial Nuclear Fuel report and World Nuclear Supply Chain report.

- We offer you heavily discounted rates to our conferences and opportunities to exhibit or sponsor to increase your company’s visibility.
Meeting at global events

The World Nuclear Association Symposium in September in London brings together high-level executives from all over the world to help shape the industry’s future.

We also organise World Nuclear Association Spotlight conferences in countries developing nuclear, and co-host the annual World Nuclear Fuel Cycle conference with the US Nuclear Energy Institute.

“A fantastic networking opportunity and a great forum to catch up with the latest developments in the industry.”

Michael Goldsworthy, CEO, Silex Systems, Symposium 2014
“You don’t realize how much you’ve learned in six weeks until you return to your day-to-day life with a different perspective and increased energy.”
Training the nuclear industry’s best

The World Nuclear University is a global partnership between the IAEA, WANO, the OECD-NEA and the World Nuclear Association to enhance nuclear education and build nuclear leadership.

Summer Institute

The Summer Institute, for young nuclear professionals, is an intensive development programme providing training on core skills for future nuclear leaders.

Short courses

Short courses cover the applications of nuclear science and technology around the world.

School on Radiation Technology

The school explores the medical and industrial uses of nuclear technology.
