

Westinghouse Electric Company, LLC (WEC), based in Monroeville, Pennsylvania, USA provides fuel, services, technology, plant design, and equipment for the commercial nuclear power industry. The primary vision of Westinghouse is to be the customers' leading choice for supplying leading-edge nuclear technology to satisfy the world's growing demand for energy. Currently, nearly 50 percent of the nuclear power plants in operation worldwide, and nearly 60 percent in the United States, are based on Westinghouse technology.

At this time, WEC is seeking nuclear professionals to guide nuclear power plant building activities supporting emerging AP1000 Projects globally. Specific locations are situated across Europe, Asia, and the Pacific Rim. Leadership candidates possessing past experience in the global nuclear industry and who are interested in participating in the WEC and Shaw new plant builds, are encouraged to submit their resumes via Email to: WECAP1000@thekeysource.com

Of specific interest are nuclear leadership candidates who have demonstrated success in the following areas: management of new nuclear plant builds, equipment, and modules in accordance with the project schedule, technical, quality, and cost requirements. Open positions include:

- Nuclear Construction Project Management Professionals
- Nuclear New Build or Re-build Engineering Experts
- Nuclear Licensing Specialists
- Other Experienced Nuclear Professionals

KeySource HCI, LLC has been exclusively retained to conduct this search on behalf of Westinghouse Electric Company, LLC.
